WORK EXPERIENCES

Full Stack Developer   03/2025 – Present
Playfields   Sleman, Yogyakarta, Indonesia (Remote)
- Architected and built multi-tenant SaaS platform from scratch enabling sports venue owners to manage bookings, serving data with real-time reservation system.
- Integrated Xendit payment gateway processing transactions monthly with secure payment handling, automated reminder, and reconciliation features reducing manual payment tracking by 90%.
- Created a responsive admin dashboard using Tailwind CSS that integrates venue analytics, revenue reports, booking workflows, and customer insights, improving clarity and decision-making for operational teams.
- Collaborated with cross-functional teams in agile environment, consistently delivering sprint commitments with on-time delivery.

Full Stack Developer   06/2023 – 03/2025
Business Watch Indonesia   Boyolali, Central Java, Indonesia
- Maintained and enhanced a legacy Android application built with Kotlin, driving over 15.000+ downloads on the Google Play Store through continuous performance and UI/UX improvements.
- Architected freemium subscription model with premium recruiter dashboard featuring candidate filtering, and analytics tools generating recurring revenue stream.
- Integrated Mailchimp email marketing automation launching targeted newsletter campaigns that increased weekly active users by 28% and improved user retention by 35%.
- Managed complete product lifecycle from requirement gathering, technical architecture design, development, testing, Play Store deployment, to post-launch feature iterations.
- Collaborated with cross-functional teams in agile environment, delivering 15+ major features across both platforms with on-time delivery and stakeholder satisfaction.

HIGHLIGHTED PROJECTS

Playfields 🔗   03/2025 – Present
Playfields is a SaaS platform designed for booking management of futsal and mini soccer fields. It provides real-time availability, online booking, and payment processing features. The system also offers management tools for field owners to control pricing, scheduling, and transaction reporting, delivering a seamless and efficient user experience.

BisnisLink 🔗   09/2024 – 03/2025
Bisnislink.id is a B2B platform connecting SMEs with resellers to facilitate online product marketing and sales. The platform includes product registration, order management, and sales reporting functionalities to streamline business processes and improve user engagement.

Kubu.id 🔗   06/2023 – 03/2025
Kubu.id is a community-based mobile application for job seekers and professionals, offering job listings, online consultations, and information sharing. It supports real-time notifications and provides a secure backend infrastructure for managing users and content.

EDUCATION

Bachelor of Science in Informatics   01/2019 – 06/2023
University of Amikom Yogyakarta   Sleman, Yogyakarta, Indonesia
3.78 GPA
